

The Fourth Rice Annotation Project Meeting Workshop

Date: October 15th, 2007

Venue: Epochal Tsukuba International Congress Center, Tsukuba, Japan

Program:

Opening remark:

Takuji Sasaki (NIAS)

Talks:

Tsuyoshi Tanaka (NIAS)

Genomic landscape of rice disclosed by large-scale analyses of the transcriptome.

Damien Lieberherr (Swiss-Prot)

Rice protein sequence annotation in UniProtKB/Swiss-Prot.

Kan Nobuta (University of Delaware)

Genome-wide annotation of rice mRNA and small RNA molecules using signature-based expression profiling method.

Jun-ichi Yonemaru (NARCT)

Efficient use of rice genome resources for forage grass improvement.

Vladimir Bajic (SANBI)

Functional Annotation of Stress Responsive Genes in Rice Based on Promoter Similarity.

Yue-Ie C. Hsing (Academia Sinica)

The annotation of rice (*Oryza sativa* L.) Lea genes.

Richard Bruskewich (IRRI)

Comparative analysis of Stress Responsive Genes in Rice

Conclusion:

Takashi Gojobori (NIG)
